

Join us for the MWPHCC Meeting

Thursday, September 7, 2017 at 6:00 p.m.

Holiday Inn of College Park

10000 Baltimore Avenue College Park, MD. 20740

Meeting and Training Sponsored by

The T-4 Training begins at 6:00 p.m. and runs for 90 minutes.

Our ROI presenters are Chris Kidwell and Paul Burke

September's training will be a discussion regarding the benefits of using Hybrid Electric Heat Pump Water Heaters and the impact of water quality on water heaters. The discussion will be led by Paul Burke and Chris Kidwell of ROI Marketing.

During the presentation, Chris and Paul will cover the following topics:

- How the efficiencies of hybrid electric heat pump water heater compare with a standard 50- gallon electric heater.
- How heat pump water heaters work.
- Where they should be installed.
- Cost benefit analysis
- Environmental impact

They will also cover how water quality has a direct impact on water heaters; especially tankless heaters. Issues caused by poor quality water are not covered by manufacturer's warranty's. During the T4 training you will learn about solutions to this problem. Low cost, high quality water filtration systems are now available that will reduce sediment and inhibit scale for all gas or electric water heaters.

7:30 PM - General Meeting & Complimentary Dinner Everyone is Welcome!

Please RSVP to Sue Thompson at sue@mwphcc.org or 301-278-2962
